Professional Summary

Software Development Engineer in Test with 2+years of experience in manual and automation testing of enterprise applications. Experienced in Selenium WebDriver, Java, Cucumber BDD, TestNG, Maven, and accessibility testing using NVDA. Skilled in regression testing, sanity testing, defect tracking, test case execution and automation framework development.

Experience

Cognizant Technology Solutions

May 2023 – Present

Jr.SDET

Bangalore, Karnataka

- Designed and developed Selenium WebDriver automation framework from scratch using Java, Cucumber BDD, Maven, and Page Object Model (POM) architecture.
- Automated 50+ end-to-end test scenarios covering login workflows, transcript creation, form validations, and dynamic user interactions.
- Implemented data-driven automation framework using Apache POI for reading and managing multi-sheet test data from Excel files.
- Validated session timeout, token expiry, and complex edge-case scenarios across authentication and workflow modules.
- Conducted accessibility testing using NVDA screen reader, validating keyboard navigation, focus management, ARIA labels, tab order, and screen reader announcements.
- Identified, logged, and tracked 70+ defects using Jira, collaborating with developers for faster root-cause analysis and resolution.
- Participated in Agile ceremonies including sprint planning and defect triage meetings.

Projects

Selenium Automation Framework | *Selenium, Java, Cucumber, TestNG, Apache POI*

- Developed automation scripts using Selenium WebDriver, Java, Maven, and Cucumber. Automated login, transcript creation, and dynamic form workflows.
- Implemented reusable methods and Excel-driven test execution.

Accessibility Testing | *NVDA*

- Performed accessibility testing using NVDA screen reader.
- Validated keyboard accessibility, tab order, labels, focus handling, and screen reader announcements.

Healenium Implementation

- Implemented Healenium to enhance automation framework stability and reduce test failures caused by dynamic locator changes .
- Improved automation script maintainability by enabling automatic recovery of broken locators during test execution.

Technical Skills

Languages: Java, HTML/CSS, JavaScript

Database: SQL,PostgreSQL

Technologies/Frameworks: Selenium, Cucumber, JUnit,React.js

CI/CD tools : Jenkins

Generative AI : Claude

Developer Tools: VS Code, Eclipse, IntelliJ IDEA

Education

JNTU-GV

Bachelor of Technology in Mechanical Engineering

Aug. 2019 – April 2023

CGPA- 8.0
