Experience

Cognizant Technology Solutions

SDET

Sept 2023 – Present

Hyderabad, India

Humana

- Built and maintained API automation frameworks using **Java**, **JUnit**, and **REST Assured**
- Validated session timeout, token expiry, and complex edge-case scenarios across authentication and workflow modules.
- Performed API contract testing, **JSON validation**, and database verification
- Integrated automated test suites with **Jenkins**, reducing execution time by **40%**
- Identified and helped resolve **50+ critical** defects by analyzing API responses and logs
- Collaborated with cross-functional teams in **Agile sprints**, contributing to faster release cycles

HCSC

- Built reusable automation components, reducing duplicate effort by **30%**
- Automated **100+ test scenarios** for REST APIs and backend workflows
- Performed end-to-end validation across multiple services, improving defect detection early in the cycle
- Reduced test execution time by **25%** through optimized test design
- Debugged and analyzed **40+** production-level issues using logs and API traces
- Reduced flaky test failures by **25%** by improving synchronization and stability strategies

LTI Mindtree

Java Developer Intern

Feb 2023 – April 2023

Hyderabad, India

- Built end-to-end mini projects with **Spring Boot** and **React**, simulating real-world full-stack applications.
- Created responsive UI components using React.js and Tailwind CSS, ensuring cross-browser and mobile compatibility.
- Gained strong foundational knowledge in **Java**, **Spring Boot**, and **Hibernate**, with a focus on **RESTful APIs**, layered architecture, and **ORM** concepts
- Collaborated closely with mentors and team leads to deliver modules on schedule, proactively resolving bug

Projects

Gameplay Website-Freelancing — Java, Spring Boot, React.js, PostgreSQL

- Built a full-stack chess platform using **React.js**, **Spring Boot**, and **PostgreSQL**, featuring gameplay, class booking and user authentication.
- Developed secure REST APIs to manage users, coaches, bookings, and game history in a multi-role environment.
- Designed a responsive UI with React.js to ensure a smooth experience across desktop and mobile devices.
- Containerized the application using **Docker** for consistent deployment and development workflows.

Automated Self-Healing Framework — Selenium, Healenium, Docker

- Engineered a self-healing automation solution using **Healenium** to eliminate **"NoSuchElementException"** failures caused by dynamic UI changes
- Reduced manual script maintenance by **25- 30%** by implementing a secondary locator lookup mechanism that automatically heals broken scripts during runtime.

Technical Skills

Languages: Java, JavaScript, C,HTML/CSS

Technologies/Frameworks: Selenium,Cucumber ,Spring Boot, Jenkins, Git,GitHub, JUnit, React.js, Tailwind CSS

Database: SQL, PostgreSQL

CI/CD & DevOps :Jenkins, Azure DevOps, Docker

Cloud Systems: Microsoft Azure

Developer Tools: VS Code, Visual Studio, IntelliJ

Education

Chaitanya Bharathi Institute Of Technology

Bachelor of Engineering in Mechanical Engineering

June 2023

CGPA-8.0
